Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 5 and 7 are objected to because of the following informalities:

In line 2 of claim 5, change "opposites" to read, "opposite".

In line 1 of claim 7, change "15" to read, "5".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "relatively larger and relatively smaller" in claim 3 are relative terms which renders the claim indefinite. The term "relatively larger and relatively smaller" are not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4-7 are rejected under 35 U.S.C. 102(b) as being Runge by '948.

Art Unit: 3723

Referring to claims 1, 2, 4 and 5, Runge discloses a hand tool comprising: a handle defining a first axis, and a seat block mounted to the handle, the seat block comprising a slot which defines a second axis, the second axis offset from the first axis; the hand tool comprises a frusto-conical slot; the seat block is threaded to the handle; and the handle defines an enlarged segment opposite the seat block.

Referring to claims 6 and 7, Runge discloses a method of increasing leverage on a handle comprising the steps of: engaging a tool with a slot upon the handle, sliding the tool toward an end of the handle, exerting force to the handle through the tool; and engaging a frusto-conical slot in the tool with the handle.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Runge in view of Owens et al. '765.

Runge is described above. Runge does not specifically disclose a semicircular opening. Owens discloses a wrench comprising a semi-circular slot. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the slot of Runge semi-circular in shape as taught by Owens et al. so as to provide additional flexibility in accessing the workpiece.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Grant whose telephone number is (703) 305-3315. The examiner can normally be reached on Mon-Fri 8:00-4:30.
